# GUARDIAN LED SCENE LIGHT

**FT-GSM / FT-GESM**

## TWO MODELS TO FIT ANY BUDGET!

The Guardian LED Scene light is offered in two versions; the Guardian (standard), and the Guardian "Elite." The Guardian LED Surface mount scene light will produce close to 6,000 measured lumens of light output and is the perfect solution for your EMS fleet or when retrofitting Fire Apparatus on a conservative budget.

The Guardian "Elite" will produce an earth shattering 12,500 MEASURED lumens, which compares favorably against fixtures commonly advertised in the fire industry as 20,000 lumens or more.

### INCLUDES:

- LIGHT FIXTURE
- GASKET
- CHROME BEZZEL
- ISOLATING MOUNT
- INSTALLATION HARDWARE

## INDUSTRY STANDARD SIZE

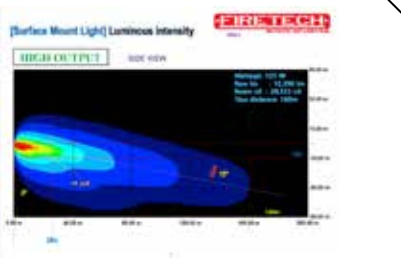

The Guardian LED scene light uses a 7.25"x 5.25" mounting hole layout which matches the most common 7x9 "900 series" fixtures in the industry. This uniformity across the industry makes the Guardian Scene Light a perfect self-installable replacement, all without needing to drill any new holes in your rig.

## GUARDIAN SURFACE MOUNT

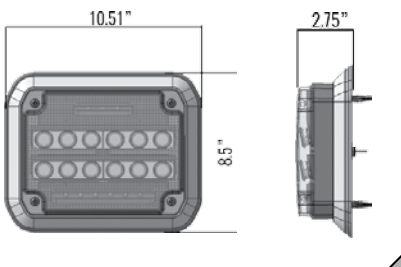

### GUARDIAN ELITE - HIGH OUTPUT

EQUIVALENT LUMENS	20,500
MEASURED LUMENS	12,290
WATTAGE	125W
AMPERAGE	10.41A
INPUT VOLTAGE	9-32V DC

### GUARDIAN - STANDARD OUTPUT

EQUIVALENT LUMENS	10,000
MEASURED LUMENS	6,500
WATTAGE	70W
AMPERAGE	5.83A
INPUT VOLTAGE	12V DC
